Work Experience

BeSmartee – Software Engineer, Full Stack

Production Defect Team

October, 2020 - Present

- Provided quick resolution for production level defects, ensuring minimal interruption to business operation
- Determined short-term resolutions for eliminating system defects, and designed long-term improvements for system enhancement
- Collaborated with Client Success, Implementation, and QA teams to provide accurate bug fixes
- Provided guidance for new and Jr developers on debugging defects and identifying long-term enhancements

Implementation Team

February, 2019 - Present

- Upgraded the **encryption** tool used by the core application to enforce secure data storage
- Developed a new, single-page application (**SPA**) using **Vue.js**, designed to create customizable user experience
- Developed applications with **PHP Laravel** framework, utilizing test-driven development (**TDD**) methodology
- Quickly adapted to developing with various frameworks/libraries including **jQuery**, **Vue.js**, **Bootstrap**, **Tailwind**, and **Laravel**
- Created clean, reusable code for **frontend** and **backend** development
- Provided guidance and advice for other developers on feature development

UX Team

July, 2018 - February, 2019

- Updated existing and created new UI focused on **web accessibility**
- Developed intuitive, responsive user interface to create effective and learnable user experience

UCLA Health / Dept. of Neurosurgery - Programmer Intern

2017-2017

Technical Projects

YAML (Yet Another Messaging Link)

[GitHub](#)

- Web application used for messaging friends
- Utilized **React** and **Redux** for creating frontend UI and state management
- Utilized **Golang** to build the backend service and **MySQL** for data storage

Awards and Recognition

Rookie of the Year - BeSmartee

2018

Education

University of California, Los Angeles | Bachelor of Arts in Psychology

Relevant courses: C++, Python, Java
